

Categories of inventions:

1. Local Sustainability (LS):
Inventions which can help solve problems for sustainability of local communities.
2. Climate Change (CC): Preparedness and Mitigation
Inventions which are built to apply technology for the preparedness and mitigation of the impacts of climate change in local context.
3. Green Products (GP):
Inventions which are environmental-friendly products
4. Technology in Nature (TN):
Inventions which are applied from natural species character.

Awards:

1. Considering score:
All inventions are competed among each other in the same category. It is possible that the highest scores of each category are not equal. All inventors are expected to specify the category for their inventions.
2. Thailand intends to provide special awards for many young inventors in order to promote and encourage them to create new scientific inventions. If you have any special awards to be presented to some inventors, please inform us the number of them you would bring along.
3. Criteria of scoring:
 - 3.1. 50 points for the creativity of inventions
 - 3.2. 30 points for the benefit of invention in daily life
 - 3.3. 20 points for the design of inventions.

Application:

1. Applicants must fill up and submit the Prior Enrollment Form within 20 July 2011.
2. Applicants must submit the complete application form within 30 September 2011.
3. Application forms should be submitted by fax, by post or email ieyithai2012@gmail.com

All invention items should be brought to and back from the venue to their countries by applicants themselves.
